Category Challenge Game

You will need: **2 or more players**
A dice
A pencil and a piece of paper to write on for each player

Instructions

Take turns to throw the dice. Move the number of spaces thrown around the board. Each player takes turns to follow the instructions on the space that has been landed on, writing down the answer on their piece of paper. Play then passes to the next player. If you can't think of an answer, you wait on that space until your turn comes around again, when you can take another throw.
The first person to get 10 words on their list has to complete the **final challenge** of making up a ***short story using all 10 of their words*** on their sheet. If they can't use all 10 words in a made up story, the challenge passes to the person who has the nearest to 10 words and they can make up a story with their words. The person who makes up the story using all of their words is the winner.
